Version *

1.0.0

Problem Statement

We noticed that there are currently no good websites for Professor Jullig to run CSE 115 on. All the existing ones are lacking in functionality or have high cost.

High Level Goals

In this release, we will implement the ability for students to join their class, join or create projects, create accounts, and be able to reset their password. There will be users of different types and they will be able to interact with one another in real time.

Sanity Check

Yes we can do it because no sprint looks like too much work.
